

Operationalizing Microsoft 365 Security

From Noise to Result

Your Presenter

Tyler Pousson

EU Account Executive

Augmentt

Microsoft 365 Has a Noise Problem

- No standard security baselines
- Thousands of alerts
- Tedious and manual
- Hard to prove value to clients

From Noise to Operational Security

M365 Security MSPs can actually run

- Standardized security across every tenant
- Fewer alerts, more signal
- 5x more tenants per technician
- Clear reporting MSPs can show clients
